

YANTRA

SOUNDS OF LIGHT

INDIA'S LARGEST DOLBY ATMOS MIX ROOM · PICTURE & SOUND UNDER ONE ROOF

INVESTOR PROSPECTUS · CONFIDENTIAL · 2026

The team behind Animal is building its own home.

Synccinema didn't just mix India's biggest films — it won the National Film Award for them. Now the same National Award-winning team is building the facility it always wished it had: India's flagship Dolby Atmos stage, in the city where the South's biggest films are made.

National

AWARD-WINNING TEAM

The sound team behind Animal, Vikram, Leo & Coolie — 200+ features, now building their own room.

~24

ATMOS ROOMS IN INDIA

The South's biggest films wait for a slot or fly their mix out. Yantra is the room they already need.

Now

THE WINDOW

Civil work is underway. Round 1 closes to keep the build on track for a 2027 opening.

Proven team · proven demand · a structurally undersupplied market. This is not a concept — it is a delivered team building its next chapter.

Dolby Atmos Certification

Dolby has responded positively to the facility. Formal certification follows once the acoustic build is complete and the speaker configuration and room volume are accepted by Dolby — the room is engineered to exceed their feature-certification standards from the start.

Positive

DOLBY RESPONSE

Dolby has replied positively on the facility and its specification.

Spec

ACOUSTIC BUILD NEXT

Room built to Dolby's standard — 26' ceiling, floating floor, full overhead Atmos field.

Accept

CONFIG & VOLUME

Certification granted once speaker configuration & room volume are accepted by Dolby.

Certification is a build-completion milestone with Dolby already engaged — not a pending unknown.

01 / FACILITY AT A GLANCE

One Campus. Every Format.

A 1.5-acre purpose-built post-production campus in Kokapet, Hyderabad — uniting India's largest Dolby Atmos mix stage, two DI suites, two 100-foot preview theatres, dedicated dubbing stages and a Home Entertainment / OTT suite under one roof.

1.5	2	2	1
ACRE CAMPUS	**DI SUITES**	**100-FT THEATRES**	**FLAGSHIP ATMOS**
Single integrated site	Colour by Red Orcher	Christie projection	India's largest mix room

WHAT IT HOUSES

- India's largest Dolby Atmos feature-certified mix stage
- Two Digital Intermediate (DI) colour suites — Red Orcher
- Two 100-foot preview theatres with Christie projection
- Large & small dubbing stages — control + voice rooms
- Home Entertainment & OTT-native mastering suite

BUILT & BACKED BY

Technical & Engineering

Ajay Reddy
Strategic Investor

Built with full Dolby Atmos technology, expert acoustic designers & best-in-class vendors · A one-stop finishing solution for Telugu, Tamil & Hindi features and OTT

01 / THE OPPORTUNITY

A Market Starving for Elite Sound

India's content economy is in explosive growth — OTT originals, theatrical features, regional cinema, and global streaming commissions are generating unprecedented demand for premium audio post-production. Yet genuine Dolby Atmos feature-certified mixing capacity remains scarce, concentrated in a handful of legacy facilities.

Yantra Sounds of Light enters this gap as India's largest Dolby Atmos mix room — a purpose-built facility in Kokapet, Hyderabad where picture (DI) and sound are finished under one roof, engineered for the precise judgement a feature mix demands.

₹6 Cr

PHASE 1 ROUND

Round 1 — open now

2026

BUILD PHASE

Construction underway — Kokapet, Hyderabad

135 dB

CERTIFICATION TARGET

Dolby Atmos feature-grade SPL

02 / THE FACILITY

Picture & Sound, One Campus

DOLBY ATMOS FEATURE CERTIFIED MIX STAGE

51' × 36' × 24'H

India's largest Atmos mix room — built for the precise judgement a feature mix demands.

DI COLOUR SUITE

Red Orcher

Digital Intermediate & colour grading — picture finished beside the mix.

DOLBY ATMOS HE STUDIO

20' × 15.5' × 12'H

Home Entertainment & OTT-native mastering suite.

DUBBING STAGES

Large & Small

34'×26' and 24'×18' — control + voice rooms for ADR & regional workflows.

02 / CAPABILITIES

What Happens Here

A single facility covering the entire finishing pipeline — every stage of picture and sound, from first mix to final preview, without the master ever leaving the building.

01 FEATURE MIXING

Dolby Atmos theatrical re-recording mixing in India's largest certified mix room — the precise final judgement of every film.

02 DUBBING & ADR

Two dedicated dubbing stages with control + voice rooms for dialogue replacement and regional-language versioning.

03 DIGITAL INTERMEDIATE

Red Orcher's DI colour-grading suite — picture finished beside the mix in the same building, one master throughout.

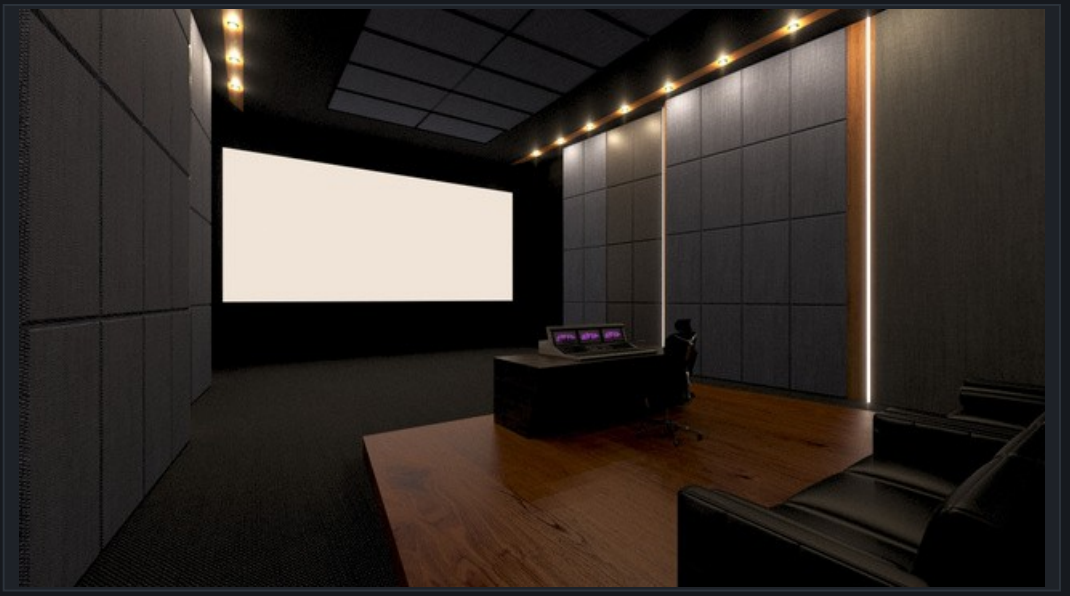

04 PREVIEW THEATRE

A 100-foot preview theatre by Red Orcher with a Christie projector — full theatrical playback for client review and final sign-off.

02 / THE PREVIEW THEATRE

A 100-Foot Preview Theatre

Built with Red Orcher, the facility's preview theatre brings true theatrical-scale playback in-house — so directors, DOPs and clients judge the final picture and sound exactly as an audience will see it.

100-FT THROW

Full theatrical projection distance — true cinema-scale image, not a monitor.

CHRISTIE PROJECTOR

Reference digital cinema projection for accurate colour & contrast judgement.

BY RED ORCHER

The DI partner's preview environment — picture & sound reviewed together.

05 / PROVEN EXECUTION

Already Built. Already Delivered.

A completed, calibrated Dolby Atmos studio executed by the same team — proof that this build is a delivered reality, not a concept. Below: the operational native Atmos suite at Studio Spectrum, Chennai.

Reference mix position & Atmos screen

9.1.4 speaker layout & acoustic treatment

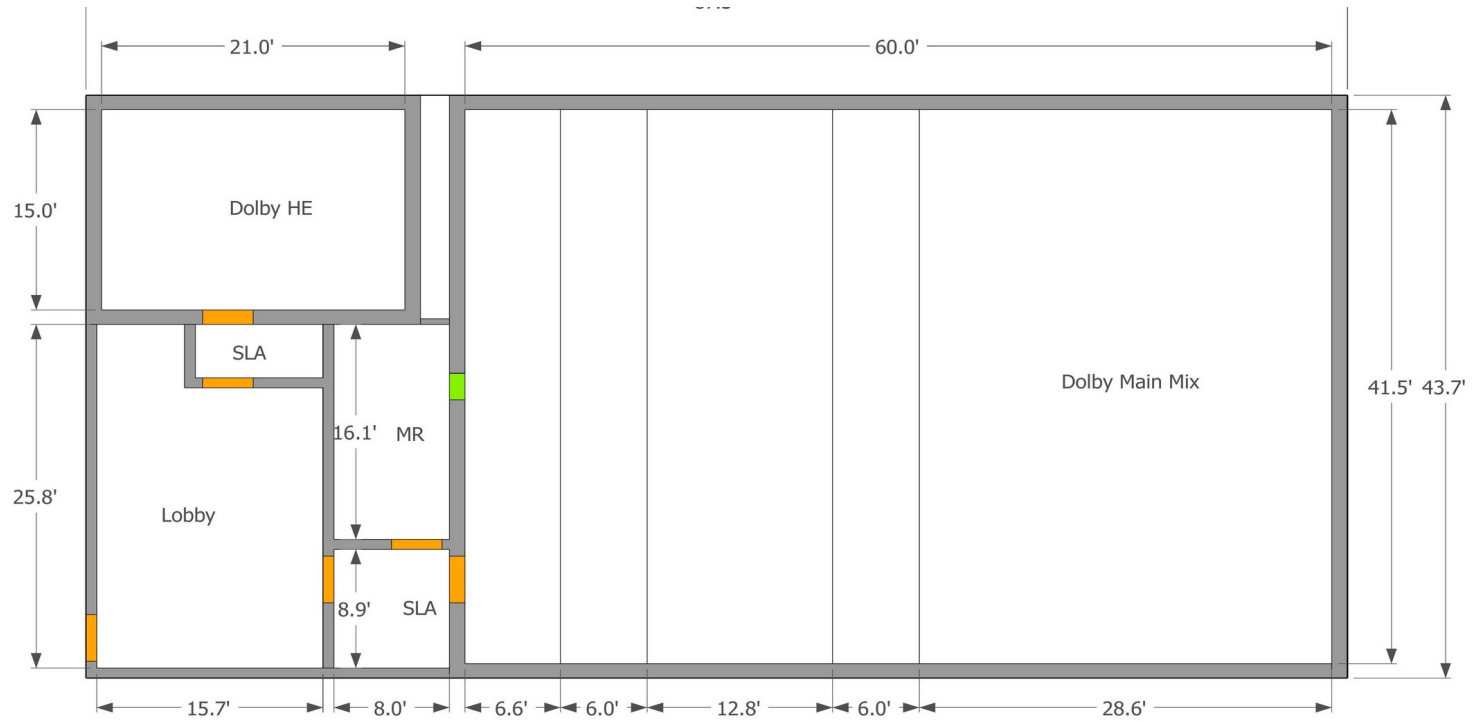

Console, monitoring & equipment rack

EXECUTED PROJECT — STUDIO SPECTRUM, CHENNAI · DOLBY ATMOS HE 9.1.4 · DESIGN BY BRIJITH MADHAVAN

- **DESIGNED & BUILT**
  Full room-within-a-room acoustic construction, in-house
- **DOLBY CALIBRATED**
  Tuned & signed off on-site by a Dolby specialist
- **OPERATIONAL TODAY**
  Live for OTT & motion-picture mixing

The Mix Stage — Floor Plan

DOLBY MAIN MIX STAGE — 60' × 41.5' · HIGH-DENSITY BRICK ENVELOPE

- **MAIN MIX STAGE**

  60' × 41.5' theatrical floor — the largest certified room in the build

- **DOLBY HE STUDIO**

  21' × 15' Home Entertainment & OTT mastering suite

- **MACHINE ROOM**

  Isolated equipment core, air-gapped from the listening field

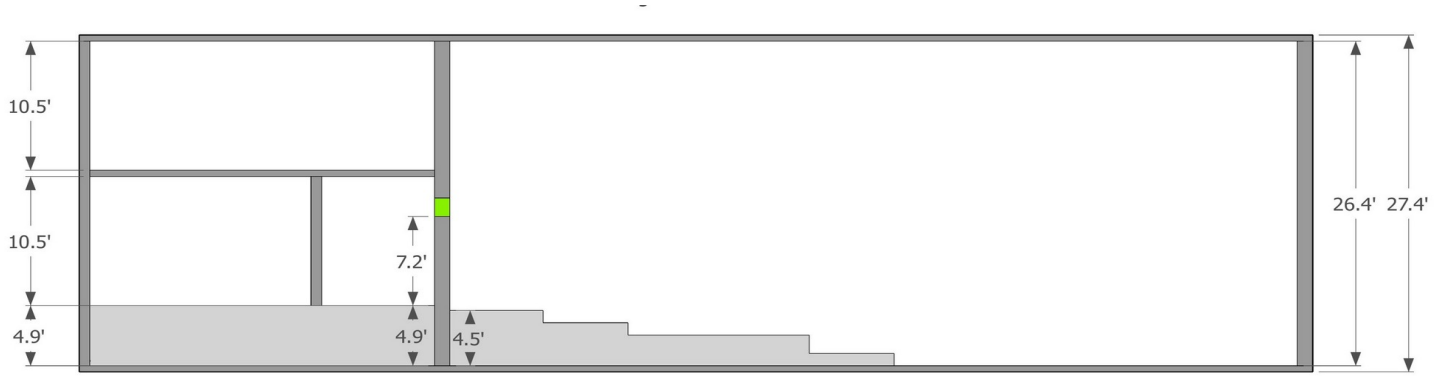

- **LOBBY & SLA**

  Acoustic airlock entry with sound-lock attenuation buffers

- **AIR GAP**

  Structural decoupling between every adjacent acoustic space

Section & Isolation Detail

PROJECTOR WINDOW — SEALED REVEAL

26' CEILING HEIGHT

Exceeds Dolby's 24' feature-certification minimum — full vertical Atmos field

FLOATING FLOOR

Resilient-mounted slab decouples the room from all ground-borne vibration

ROOM-WITHIN-A-ROOM

An independent inner shell — floor, walls & ceiling on isolation mounts

2.8' FLOOR VOID

Isolation gap beneath the floating slab for true mechanical separation

04 / THE TECHNOLOGY

Why Dolby Atmos

Dolby Atmos replaced fixed channels with audio objects that move freely through three-dimensional space — including overhead. It is the global standard for theatrical and premium streaming delivery, with a single Digital Cinema Package that scales across every certified room worldwide.

01

OBJECT-BASED AUDIO

Sounds treated as individual entities, positioned anywhere in a 3D field — not locked to channels.

02

OVERHEAD IMMERSION

Height channels create lifelike spatial depth that follows the action on screen.

03

UNIVERSAL DELIVERY

One DCP master plays across all theatre configurations and OTT platforms.

04

FUTURE-PROOF

Backward-compatible and scalable — protects the facility's capital investment.

06 / MASTER PLAN

The Kokapet Campus

A purpose-zoned facility in Kokapet — the heart of Hyderabad's Financial District — separating client flow, production zones, technical cores, and the acoustically critical mixing envelope. Parking, reception, and admin sit clear of the studio block, with the mix stage as a structurally independent standalone building.

- **Standalone mix building**

  Independent foundation — zero shared vibration paths

- **Separated client & crew flow**

  Talent, clients and production move through distinct zones

- **Technical core isolation**

  Machine rooms, power & HVAC acoustically buffered

- **Vastu compliant**

  Spatial layout aligned for energetic coherence

07 / TECHNOLOGY STACK

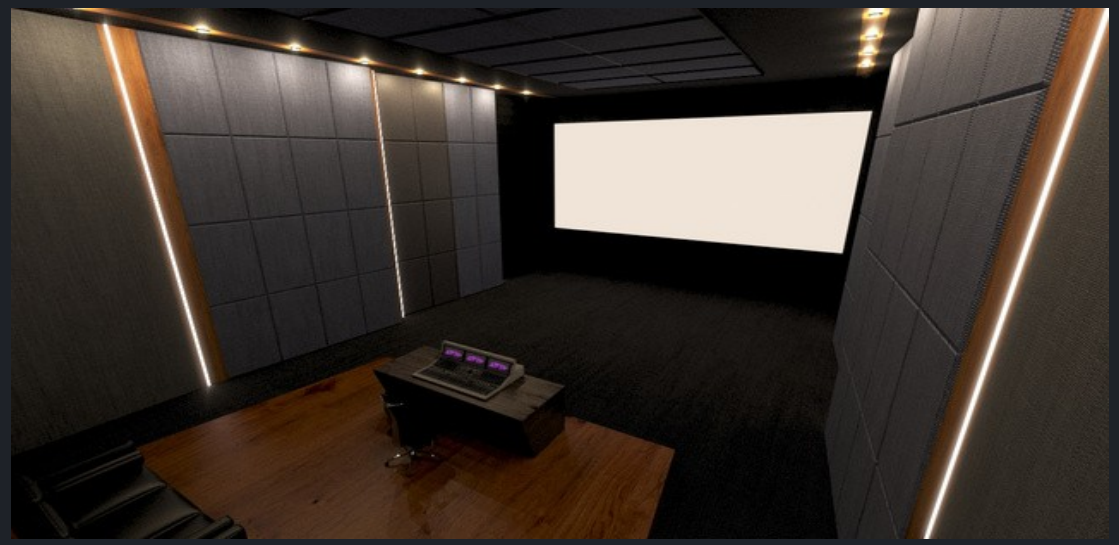

The Signal Chain

A fully Dolby signal chain end to end — Dolby screen speakers on the front stage, a complete Dolby Atmos surround and overhead array, rendered and mastered through Dolby's own platform for true feature-certified delivery.

LCR MAINS	Dolby	Theatrical front soundstage — the critical listening position
SUBWOOFERS	Dolby Subwoofers	Full-range low-frequency extension to 135 dB
SURROUND & OVERHEAD	Dolby Atmos Array	Full object field — overhead + side surround immersion
PROCESSING	Dolby Atmos Renderer	Object rendering, bass management & monitoring
RENDER & MASTER	Dolby Atmos RMU	Mastering & DCP delivery across all configurations

A Walk Through Yantra

From the street to the mix position — every threshold shifts the visitor from the outside world into a sealed space of sound. Below: design renders of the upcoming Hyderabad mix stage.

01 ARRIVAL

Landscaped entry. Client & crew flows separate at the door.

02 THE LOBBY

An acoustic airlock — the sensory reset before the stage.

03 THE MIX STAGE

60' of floating-floor theatrical space, full overhead Atmos.

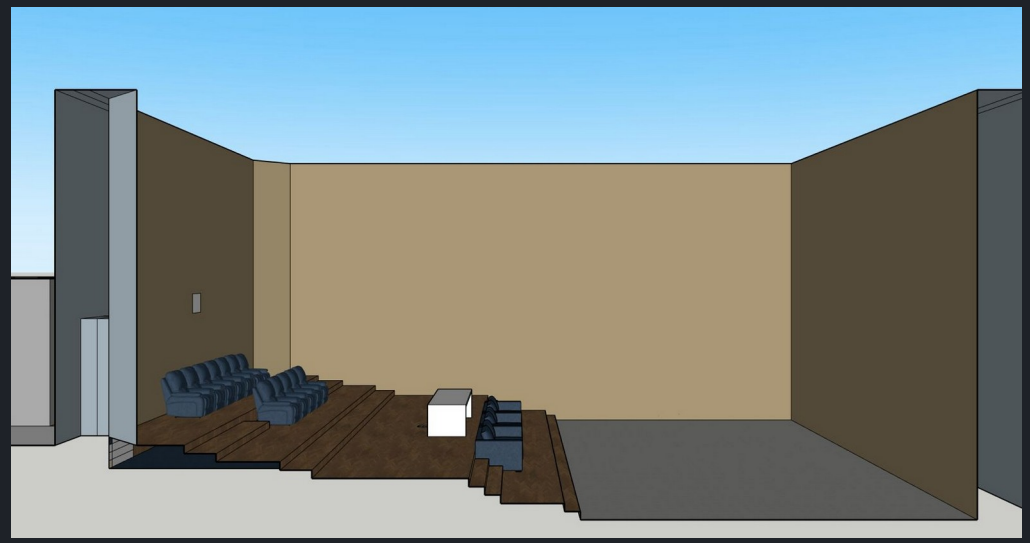

04 THE SUITES

HE mastering & dubbing stages branch off the core.

09 / THE FULL PIPELINE

Picture Meets Sound

Red Orcher brings a full Digital Intermediate & colour-grading studio into the same facility. For the first time, a filmmaker can finish picture and sound in one building — colour graded, mixed, mastered, and delivered without ever moving the master between vendors.

DI COLOUR SUITE

Reference-grade colour grading in a calibrated theatre alongside the mix stage.

ONE MASTER, ONE ROOF

Picture & sound finished in one facility — no handoffs, faster turnaround.

DOLBY VISION READY

Atmos for sound, Vision-grade colour for picture — end to end.

Built by Sync Cinema

Designed, built and operated by Sync Cinema (Hariharan & Sachin Sudhakaran), head-quartered in Chennai — with ₹4.5 Cr already committed by partners. ₹2 Cr round open.

SOUNDS OF LIGHT

Y · S · L

Where acoustic science meets the geometry of light.

SYNC CINEMA · ARAVIND MENON · AJAY REDDY · RED ORCHER

Elite Capacity Is Scarce. Demand Is Not.

India produces over 1,500 features a year and hundreds of streaming originals — yet genuine Dolby Atmos theatrical mixing capacity sits in a handful of facilities nationwide. In the South, it is thinner still.

~24

ATMOS MIX FACILITIES

In all of India — against 1,500+ features a year. (Dolby, 2025)

315

OTT ORIGINALS, 2024

Telugu 21 · Tamil 20 — streaming demand concentrated in the South. (Ormax)

2 + 4

THE COMPETITION

2 modern Atmos studios and 4 ageing legacy mix rooms serve the Southern pipeline.

Atmos

NOW A DELIVERY STANDARD

Netflix, Prime & Hotstar stream Atmos titles — it is increasingly the spec, not the extra.

Most existing Southern capacity sits in a few ageing legacy rooms, with only a couple of modern Atmos studios. Yantra enters a market where demand for premium immersive audio structurally outstrips current, up-to-date supply.

Sources: Dolby Laboratories (Apr 2025) · Ormax Media, Indian Streaming Originals 2024 · industry mapping.

How busy will the facility be?

The honest investor question. The Murdoch-backed Bodhitree (₹500 Cr hub) models ~30% capacity in year one ramping cold. Yantra starts ahead of that — because in the South, the films are already here and the rooms are not.

YEAR-ONE UTILISATION

New-build benchmark (Bodhitree) **~30%**

A world-class facility ramping to clients cold.

Yantra — with a built-in slate **higher from day one**

We arrive with our own films already needing the room.

WHY WE START AHEAD — THE SOUTH PICTURE

01 **215 Telugu films released in 2024** — the highest of any Indian-language industry. Add Tamil, Kannada & Malayalam and the South is the country's busiest production base.

02 **90%+ of Telugu production sits in Hyderabad.** Yantra is at the centre of the work — not a destination clients must travel to.

03 **Studios already run 95%+ full** at peak windows; productions that can't get slots relocate to Chennai. The capacity simply isn't there.

04 **Our own slate fills the room.** The founding team's films — 200+ features — mix here instead of waiting for a slot or flying the mix out.

~30% is the industry's conservative cold-start baseline. Yantra opens with committed work in the busiest film market in India — so we start above it, with a clear path up.

The demand is already here.

Yantra isn't a bet on a market forming. It's a room for a market that is already the busiest in the country — and short on world-class Atmos capacity.

215

Telugu films released in 2024

The highest theatrical count of any Indian-language industry — before Tamil, Malayalam & Kannada are counted.

90%+

of Telugu production is in Hyderabad

Yantra sits in Kokapet, at the heart of where the films are actually made.

95%+

studio occupancy at peak

At Ramoji & Annapurna during festival windows — productions that can't get in leave for Chennai.

+34%

Hyderabad post-production export growth

Year-on-year, FY2023–24 — the post-production economy is expanding, not shrinking.

₹11,833 Cr

total Indian box office, 2024

South cinema drove it — Hindi fell to a 40% share, and ~31% of even Hindi revenue came from South dubs.

The gap

Record output, too few Atmos rooms

India's busiest film base is structurally short of flagship mixing capacity. Yantra is built for exactly that gap.

Sources: KITalent (Tollywood output & occupancy) · Gitnux (Telugu industry) · Ormax Box Office Report 2024 · figures indicative, full citations on request

₹1.5 Cr to Complete Phase 1

Of the ₹6 Cr Phase 1 build, ₹4.5 Cr is already committed by Sync Cinema, Aravind Menon and Ajay Reddy. We are raising the remaining ₹1.5 Cr — offered as flexible credit, not equity dilution.

THREE WAYS TO PARTICIPATE

Term Loan	11% p.a. + full principal
Partnership	12% p.a. + 10% premium + principal
Growth Partnership	12% + 10% + 3% profit share
Moratorium	15 months (through build)
Repayment	Quarterly, once operational

INDICATIVE RETURNS (XIRR)

Term Loan	~9.0% annualised
Partnership	~11.1% annualised
Growth Partnership	~11.1% + ongoing profit share
Capital returned	100% principal, in full
Equity / shares	None — profit share, not shares

GROWTH PARTNERSHIP · 3% OF ANNUAL NET PROFIT AFTER REPAYMENT · NOT A SHAREHOLDER

Indicative terms to illustrate the payment structure. Exact rates, timelines and finer details are finalised in the formal agreement. Nothing here is a binding offer.

A ~10-Year Partnership

Yantra is a project-based business — income scales with the films and series the facility wins, not a fixed monthly yield. The structure and principal are defined; the upside grows with the work. We see this as a ~10-year horizon, and it can arrive faster as marquee projects land.

10 yrs

THE HORIZON

A long-game partnership in a flagship facility — returns realised over roughly a decade of operation.

Per project

HOW INCOME WORKS

Revenue is earned title by title. Rates and volume vary with each project, so the facility's earnings build with its slate.

Upside

FASTER WITH SCALE

Big-budget features and premium OTT work accelerate the return — the bigger the titles, the sooner the horizon closes.

The nature of the work is per-project, so this deck sets out the structure and the horizon. Specific project economics are best walked through in person, against the live facility and current slate.

Risks & How We've Handled Them

Certification timing
Dolby has replied positively; room exceeds their spec. **Certification follows acceptance of the built room.**

Key-person dependence
Built on a proven two-founder partnership plus mix, DI & acoustic partners — **not one person.**

Repayment during build
15-month moratorium through construction — **repayment begins only once the facility earns.**

Utilisation ramp
The founding team brings its own slate of films — **demand walks in with the operator,** not sought cold.

Construction overrun
Fixed-scope ₹6 Cr Phase 1, ₹4.5 Cr already committed; **experienced acoustic partner (Lisen) engaged.**

Market / demand
~24 Atmos rooms nationwide vs 1,500+ films a year — **structural undersupply, not a bet on growth.**

A de-risked build by a team that has delivered at the highest level — the questions an investor would ask, answered up front.

Let's build it together.

₹1.5 Cr

TO COMPLETE PHASE 1 · ₹4.5 CR ALREADY COMMITTED · ₹6 CR TOTAL

🤝

Let's talk
